

**MPF001 - Translation of PCT Reports - p 11**

## Claims

1. Sleeping bag constructed of side by side chambers formed by dividing walls and filled with stuffing material, inner and outer shells that cover the chambers, and a zipper,  
whereby the outer shell (2) consists of a waterproof material,  
whereby the outer shell (2) and the dividing walls (5) or the outer shell and the attachment strips (6) bonded to the dividing walls consist of a weldable material, characterized by  
the dividing walls (5), which are welded or glued at their ends or via the attachment strips (6) to the inside of the outer shell,  
the inner shell (6), which consists of a breathable textile;  
and the dividing walls (5), which are sewn at their other ends to this textile.
2. Sleeping bag according to claim 1,  
characterized by  
the dividing walls (5), which are sewn to the attachment strips (6).
3. Sleeping bag according to claim 1 or 2,  
characterized by  
the presence of a waterproof zipper or a zipper covered by a waterproof outer flap.
4. Sleeping bag according to claim 3,  
characterized by  
the outer flap, which is welded to the outer shell (2).

**MPF001 - Translation of PCT Reports - p 12<sup>5</sup>**

5. Sleeping bag according to one of the preceding claims,  
characterized by  
the outer shell (2) and the attachment strips (6), which consist of a thermoplastic  
material like PVC or polyurethane or a fabric coated with these materials.

6. Sleeping bag according to one of the preceding claims,  
characterized by  
the dividing walls (5), which consist of tricot or mosquito netting.
